

“Performance-analysis partner to Golf Digest”

We have found a game analysis program that accurately evaluates your golf game and does so in a unique way. This online program measures the strengths and weakness of your game and then compares them to your Target handicap. This insightful analysis will be most helpful in directing the focus of our instruction and your practice time. Bottom line, it will help us help you to improve more quickly.

SHOT BY SHOT is simple to use and equally effective for golfers of all skill levels, including those playing on an elite or competitive level. We highly recommend that all of our students make **SHOT BY SHOT** part of OUR game improvement equation!

Circle GIR's:	1	2	3	4	5	6	7	8	9	
Chip/Pitch:										
Sand:										
# Putts:										
Distance:										
Score:										

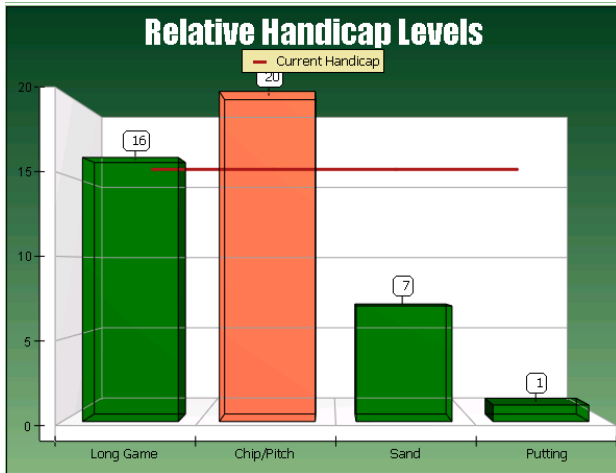

What you track

Driving: Track the useful data. A simple fairway hit or missed doesn't tell much about the miss. With Shot by Shot, you track the severity of the miss.

Greens in Regulation.

Short Game Effectiveness: Were you successful with chip or short pitch or your sand shot.

Putts and Distance: You track the number of putts and the length of the first putt. The distance information is used for your putting, but also is used to measure the effectiveness of your approach shots and short game.

What you get

Driving Accuracy – Relative Handicap: They will compare your frequency AND SEVERITY of missed fairways to their extensive database and provide an accurate handicap for your driving performance.

Long-Game Efficiency: In addition to evaluating your performance on Greens in Regulation, Shot by Shot looks at the result – how close do you put the ball to the flag.

Short Game: Not just how close you put your chip/pitch/sand shots to the flag, but how many errors (shots missing the green) do you make in your short game.

Course-Specific analysis: Shot by Shot tracks the distance of your putts in addition to the number, providing you with a more comprehensive analysis your game on the green.

The annual subscription rate for the complete Shot by Shot program (including unlimited rounds and analysis) is usually \$79. Non-member Clubgolf clients save 38% and pay only \$49. Clubgolf members pay only \$39 – a 50% savings. Sign up at the front desk, and we will get you started right away.
